## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a pneumatic tire comprising an object fixed to a tread inner surface by a ring-shaped jig, the object changing in cross-sectional area around the tire circumference, classified in class 152, subclass 450.
  - II. Claims 7-10, drawn to a tire cavity resonance suppression device comprising a ring-shaped jig and an object changing in cross-sectional area around the tire circumference, classified in class 181, subclass 208.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of the combination (pneumatic tire structure, device attached to tread inner surface rather than another location on the tire inner surface or a location on the rim) show that the particulars of the subcombination are not the sole basis for patentability of the combination. The subcombination has separate utility such as a tire cavity resonance suppression device fixed to the wheel rim or to another location on the tire inner surface, or a resonance suppression device for other rotating bodies (for example rotating shafts in machines).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Carl Schaukowitch on December 13, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made,

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
